PROFILE

Frontend Engineer with experience building enterprise web applications from the ground up using React, Next.js, TypeScript, and modern frontend technologies. Experienced in designing scalable frontend architecture, translating complex UI/UX designs into production-ready applications, and integrating enterprise systems including SAP-backed services. Passionate about creating maintainable, reusable, and high-performance web applications while collaborating effectively within Agile development teams. Adaptable, quick to learn new technologies, and committed to delivering clean, scalable solutions that enhance business processes and user experience.

EXPERIENCE

PT Fanintek - (Client: PT Kereta Api Indonesia)

HRIS (PHP Native MVC & SAP Integration)

• April 2025 - September 2026

- Developed and maintained enterprise HRIS modules used across PT KAI while enhancing existing legacy PHP MVC applications and delivering multiple new business features.
- Integrated SAP data and internal enterprise services into HRIS through REST APIs, ensuring accurate and reliable employee information across the system.
- Developed QR Code-based employee verification features for PT KAI Family Gathering events, enabling seamless attendee validation through integrated HRIS data.
- Implemented digital employee agreement workflows with configurable active periods, allowing organization-wide acknowledgment of mandatory corporate documents.
- Built and enhanced payroll, employee transfer, and HR administration features to simplify internal business processes.
- Performed bug fixing, feature enhancement, and legacy system remodeling to improve usability and maintainability

PT Fanintek - (Client: PT Kereta Api Indonesia)

Integrated Talent Management System (React.js + Vite + TypeScript)

• April 2025 - September 2026

- Developed approximately 90% of the frontend application for PT KAI's Integrated Talent Management System using React, TypeScript, and Vite.
- Built responsive dashboards, reusable UI components, complex data tables, charts, search, filtering, pagination, export, and CRUD functionalities.
- Implemented authentication, authorization, and role-based access control for enterprise users.
- Integrated numerous REST APIs with backend enterprise services using TanStack Query for efficient server-state management.
- Optimized frontend architecture, state management, and application performance to support scalable enterprise workflows.
- Collaborated closely with QA, Backend Engineers, SAP teams, Business Analysts, and stakeholders throughout Agile sprint cycles.

PT Fanintek - (Client: PT Kereta Api Indonesia)
InternHub (Next.js + TypeScript)

• April 2025 - September 2026

- Developed approximately 90% of the frontend application for PT KAI's Integrated Talent Management System using React, TypeScript, and Vite.
- Built responsive dashboards, reusable UI components, complex data tables, charts, search, filtering, pagination, export, and CRUD functionalities.
- Implemented authentication, authorization, and role-based access control for enterprise users.
- Integrated numerous REST APIs with backend enterprise services using TanStack Query for efficient server-state management.
- Optimized frontend architecture, state management, and application performance to support scalable enterprise workflows.
- Collaborated closely with QA, Backend Engineers, SAP teams, Business Analysts, and stakeholders throughout Agile sprint cycles.

PT Fanintek - (Client: PT Kereta Api Indonesia)
Additional Responsibilities

• April 2025 - September 2026

- Participated in Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective, UAT, and production deployment.
- Managed GitLab repositories, merge requests, conflict resolution, deployment verification through Jenkins, and maintained code quality using SonarQube.
- Worked closely with cross-functional teams including Business Analysts, QA Engineers, Backend Developers, SAP Consultants, and UI/UX Designers.

Freelance
Fullstack Web Dev (Live Tracking)

Februari 2024 -April 2024

As a freelance developer for the gamified live tracking project:

- Designing and developing the application architecture using React.js, Express.js, Node.js, and MySQL.
- Implementing key features such as interactive maps, real-time data visualization, user management systems, and third-party API integrations.
- Integrating with MySQL database to store and manage user data, transactions, and tracking information efficiently.
- Acting as the main liaison between frontend, design, backend, and project management teams to ensure synergy and project goals alignment.
- Guiding and mentoring team members to enhance their technical and soft skills, fostering productivity and quality work.
- Conducting thorough testing and maintenance to ensure optimal performance, security, and ongoing support for the application.

Freelance
Web Dev Profile Company (Neljish Gigbag)

• Agustus 2024 - Oktober 2024

- As a freelance developer for the project:
- Designed and developed a high-performance, scalable application architecture using Vite, React, and TypeScript, ensuring fast build times and a robust, maintainable codebase.
- Integrated advanced features such as interactive maps, real-time data visualizations, dynamic user management systems, and seamless third-party API integrations, significantly enhancing user engagement.
- Independently managed the full development lifecycle, from planning and design to deployment, ensuring the project met all client requirements and quality standards.
- Acted as the sole point of contact, collaborating with external partners and stakeholders to ensure alignment with client goals and expectations.
- Focused on optimizing application performance, ensuring security, and providing ongoing support through extensive testing and maintenance practices.

- Be the main liaison between the Frontend team and other teams, such as design, backend developers, and project management. Ensure all parts of the team work synergistically to achieve project goals.
- Designing the application or website architecture, selecting the right technologies, frameworks and tools to ensure optimal scalability, performance and security.
- Guide team members, provide direction, and develop their technical and soft skills. Provide inspiration and motivation to increase productivity and work quality.

Visit Ind
Front End Web Developer

August 2021 - November 2021

- Created Web design that has been orderd by ui designer.
- Ensure that the website created is user friendly.
- Responsible so that users can get information to interact with the site or web comfortably

Visit Ind
Scrum Master Apps Developer

November 2021 - January 2022

- Making changes to increase the productivity of the scrum team
- Planning the implementation of scrum in the organization.
- Lead and guide the organization in the implementation of Scrum.

EDUCATION

SMA 2 CIANJUR
IPA

2016 - 2018

INSTITUT TEKNOLOGI ITENAS BANDUNG
Teknik Informatika

2018 -2025

SKILLS

Front-End

- React.js
- Next.js
- TypeScript
- JavaScript (ES6+)
- HTML5
- CSS3
- Tailwind CSS
- SCSS
- Shadcn UI
- Vite

State Management

- Zustand
- TanStack Query
(React Query)
- React Hook Form

Backend Knowledge

- PHP Native (MVC)
- Laravel
- Express.js
- REST API
Integration
- Swagger /
OpenAPI

UI / Data

- Responsive Design
- Dashboard
Development
- Data Visualization
- Charts
- TanStack Table
- CRUD
- Search
- Filtering
- Pagination
- Export
- QR Code Integration

TOOLS

- Git
- GitLab
- Jenkins
- SonarQube
- Postman
- Figma
- npm
- pnpm

DEVELOPMENT METHODOLOGY

- Agile Scrum
- Sprint Planning
- Sprint Review
- Sprint Retrospective
- UAT
- Code Review
- Production Deployment
